
Engine tuning

Posted by want to win - 2008/07/06 20:39

I had my Zapcat Engine tuned up by Mike Hatting at the end of last year and due to some problems have had to have it stripped down again this year. Since the rebuild it has lost some of its performance.

I cannot get hold of Mike in South Africa and I was wondering if anybody knows anyone else who is good with tuning Tohatsu engines, or if anybody knows if Mike is coming back to the UK this year.

I know its a Zapcat but we all need help sometimes.

Hi want to win,

If you want your Zapcat to go fast then we can help you.

We currently support the Selftrade All girl race team in the Thundercat series - the girls are doing pretty well and have managed a few podiums this season already so the results speak for themselves!

If you want us to have a look at your engine, feel free contact us on carl@ceasar-racing.co.uk or paul@ceasar-racing.co.uk to discuss.

Cheers

Paul Berkinshaw
Ceasar Racing
